

# **CORDLESS** **CELLULAR SHADES**

**It's cordless.** The cordless mechanism functions almost like magic. We've created a product that is both safe for children and pets because it uses no cords and is easy to use due to its smooth cordless operation. You may raise or lower your cordless shades to your desired height effortlessly with a gentle push or pull on the bottom rail. It's that simple. And no matter what size the shade, every one of your cordless cell shades will remain level and equalized at every height.

**It's insulating.** Another desirable feature of our best cordless cellular shades is the cell construction of the fabric used to make the cordless shades. As you probably know, windows are typically the number one location for the transfer of heat or cold into your home. But with the honeycomb construction, you can provide the one of the strongest insulation available for your window coverings.

## **SPECIFICATIONS :**

**Material :** *Non-woven polyester*

|                                     |          |     |
|-------------------------------------|----------|-----|
| Blocking %                          | Mean UVB | 98% |
|                                     | Mean UVA | 94% |
