- Melbourne's largest instore displays of plantation shutters - including Basswood Plantation Shutters, Western Red Cedar Plantation Shutters, Artwood Plantation Shutters and Enviroshield Plantation Shutters.

- NEW RELEASE- ECO Shutters - Indoor/Outdoor Plantation Shutter

- NEW RELEASE - Motorised Shutters & Aluminium External Shutters now available

PRICE CRASH!!!

Enviroshield are Australia's Most Affordable Plantation Shutters. Made of a wood composite and resin core, they have a hard durable polypropylene surface - which will not dint or scratch. This toughness makes Enviroshield Plantation Shutters suitable for all areas including kitchens where other window treatments may deteriorate due to rigors of

environment.

Incredibly easy to wipe clean and energy efficient, they truly are a magnificent product.

SAVE UP TO 30% compared to traditional painted timber plantation shutters!!

Incredible value for a premium product.

ECO Shutter

****NEW RELEASE**

Indoor or Outdoor Use

Eco Shutters will not fade, crack, dent or peel. Suitable for all locations including bathrooms, kitchens, BBQ areas, verandahs and more. Eco Shutters do not absorb moisture.

Special hardware is used if shutters are installed for outdoor use.

The UV stabilised hard wearing material can withstand constant water and the harsh Australian elements.

STRONG & DURABLE

ARTWOOD Plantation Shutters keep looking their best in any environment. Featuring UV inhibiting finishes and tested for high heat deflection temperature, your investment is protected against warping, chipping and cracking. Plantation shutters are made using a timber core which is encased in a synthetic product called ABS (Acrylonitrile Butadiene Styrene). The advantage of ABS is that this combination provides strength, rigidity and toughness. ABS has been used to make telephones, helmets, luggage and car bumpers to name a few applications.

HARDNESS - Artwood is very hard wearing and is more resistant to knocks and bumps than timber. Enjoy all the construction benefits of timber plantation shutters plus added benefits.

All the appeal of timber but less expensive!

NORMANDY SHUTTERS
Hardwood Timber

A perfect plantation shutter can add character and set the mood for any room. The textured finish of Normandy Hardwood Plantation Shutters blends the tranquility of nature with distinctive luxury.

The hand finishing process involving multiple sanding and coating ensures you receive the most premium plantation shutter on the market. Also features mortise & tenon joints, quarter sawing and engineered stiles (see 'Basswood' section below)

A beautiful timber grain is more visible in Normandy Plantation Shutters than Basswood Plantation Shutters.

AVAILABLE IN 60 COLOURS

BASSWOOD Plantation Shutters ensure a lifetime of durability through the use of the finest materials, handcrafting processes, advanced technology and quality control systems.

Exceptional Materials: by quarter sawing, the timber is made less susceptible to cupping, twisting and warping. This method provides for remarkable strength and stability.

Craftmanship: Mortise & Tenon joinery ensures perfect joinery coupled with hand finishing, a brilliant, deep finish is achieved.

Engineered Stiles: multiple layers of bonded timber in the stiles provides an extremely robust support system for panels.

UNCOMPROMISED QUALITY & FINISH.

UNBEATABLE QUALITY

The beauty of WESTERN RED CEDAR lies in its natural, random finish. If you are looking for a very natural timber look, WRC is an ideal choice. Western Red Cedar has a naturally occurring wide variety of colour, from milky white to chocolate brown. Choose from light/medium finish or medium/dark.

Western Red Cedar is a very stable timber and is used in blinds and shutters for this reason.

Featuring mortise & tenon joints, quarter sawing & engineered stiles, WRC Plantation Shutters are a magnificent addition to any home or office.
