

Panel Glides

Panel Glides

Are you looking for a high-end designer vertical window treatment for your sliding glass door or window? Perhaps you would like to have a ceiling-mounted retractable room divider? With Home Outlet's sliding panels, any of these dramatic presentations can be a reality.

Panel glides are available in CUSTOM MADE or READYMADE.

Custom Made Panel Glides

CUSTOM MADE Panel Glides allow you to select from over 70 colors and exactly match the color selection of our roller and roman blinds. Centre opening, left opening or right opening can be specified at any width up to approximately 5.6 meters.

Ready-To-Hang Panel Glides

Ready-to-Hang Panel Glides are up to 70% less than custom made and are available in 6 popular fabrics. The fabrics are the same quality as custom made and the only difference is that the product is pre-assembled in 5 standard widths. As most panel glides are mounted to the architrave face of a sliding door or window frame, it is fine if the track overhangs either side of the architrave by a centimeter or two. The fabric drop comes in a standard 240cm height which can be very easily adjusted to the desired height at home. This product is fantastic for Do-It-Yourself (DIY) allowing you to SAVE huge amounts of money while not compromising on quality.
